    Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                 1074

adenylate kinase (EC 2.7.4.3) ADK2 - yeast (Saccharomyces cerevisiae)
N.Alternate names: PAK3 protein; protein YER170w
C; Species: Saccharomyces cerevisiae
:;Date: 12-Mar-1993 #sequence_revision
C;Accession: S23568; JC1135; S50673
R;Schricker, R.; Magdolen, V.; Bandlow, W.
Mol. Gen. Genet. 233, 363-371, 1992
A;Title: A new member of the adenylate kinase family in yeast: PAK3 is high A;Accession: S23568; MUID:92318888; PMID:1620094
A;Accession: S23568
                                                                                                                                                                                                                                                                                                                                                             A;Description: phosphotransferase
C;Superfamily: adenylate kinase
C;Keywords: ATP; mitochondrion; nucleotide binding;
F;21-28/Region: nucleotide-binding motif A (P-loop)

"The refined structure of the complex between adenylate kinase from beef heart mitochondrial matrix and its substrate AMP at 1.85-A resolution.";

J. Mol. Biol. 217:541-549(1991).

-I- CATALYTIC ACTIVITY: GTP + AMP = GDP + ADP.

-I- SUBURIT: MONOMER.

-I- SUBURITARITY: BELONGS TO THE ADENYLATE KINASE FAMILY.
